

AMV PRONOX™

SOFTWARE FOR
PLANNING, PROGRAMMING
AND MONITORING PROCESSES

- Pronox plans the production, minimizing lead time and optimizing resources.
- Pronox controls real time work flow and determines production deadlines.
- Pronox anticipates resource needs and creates opportunities for company expansion and growth.

Pronox is advanced software for manufacturing resource planning, automatically taking into account contingencies and optimizing work sequences to meet production targets, resulting in effective planning of all the company's resources.

It is a flexible, reliable and versatile tool which provides the company with the benefits needed to increase their competitive edge. Its ability to meet deadlines to the requests for bids and improved documentation budgets, increases customer confidence and prepares the company for new growth opportunities.

OPTIMIZE RESOURCES, CONTROL WORKLOAD AND FIX DELIVERY DELAYS

WITH **PRONOX** ALL IS IMPROVE

PRONOX ALLOWS YOU TO:

- ✓ Reduce fabrication costs, between 8% and 15%.
- ✓ Implement your own customized planning method, according to your resources, applying all the algorithms needed.
- ✓ Manage short, medium and long term workloads.
- ✓ Find limiting resources and surpluses quickly and anticipate recruitment needs or machinery and equipment purchases.
- ✓ Be aware of work in progress in real time, globally, by resource and by fabrication phase.
- ✓ React in the event of any production incident.
- ✓ Anticipate raw material needs according to the planning.
- ✓ Update in real time the expected completion dates of orders and phases according to the production progress and incidences (rejections, failures ,workers on leave...).

INTEGRATED AND SYNCHRONIZED PLANNING WITH ERP

Pronox's synchronization with ERP increases capacities in production because this integration allows you to monitor the manufacturing in real time, detecting incidents and reprogramming new work orders if the capacity of the lines of resource changes or if manual changes are made to the program.

INTUITIVE, CONFIGURABLE AND EFFICIENT SYSTEM

Pronox presents an intuitive graphical interface through a system of configurable panels and colour codes that allow you to identify quickly the information to facilitate query and programming tasks. To complete its effectiveness,

Pronox provides the possibility to generate manufacture and construction printable reports.

SUPPORT AND TRAINING

From the initial implementation of software, we offer a counseling service and updates that are maintained over time. You will also be able to customize your Pronox version by developing modules and reports tailored to your needs.

We have access to a personalized service worldwide by remote control, video or telephone contact.
